

We are preparing for a strong start to the school year by making sure staff, students, and families have the tools and training needed to feel confident about distance learning. The school board has approved a new calendar and the start of school has been changed.

Staff will receive training from August 31 through September 4th to prepare for the upcoming year.

From September 8-11th teachers will hold individual conferences with students and parents to answer specific questions and make sure everyone is ready for school. Information on the conference sign-up process will be coming later in the month.

Distance learning classes start on September 14 for all SPS students K-12. For ELL students this will also include some small group in-person instruction.
