

# Body Systems Project

## What is this Assignment About

You need to choose one of the body systems shown in this picture to study and write about.

## What Are The Activities

Your project is to find out the following information about the body system you have picked:

1. Organs that are included
2. Role of that system or what it does in your body
3. What part or parts of your brain is responsible for controlling it
  - a. If you choose Nervous System, you need to tell which part of the brain controls each system in the picture
4. What are 3 bad things that can happen to it
5. If something bad happens to that system, what can you do to help it get better

## How You Will Get Credit

You will type this information in a Microsoft Word document and email it to Mr. Hurley by Sunday evening at 11:59

## How much Time Should This Take

Once you know what system you will be studying, there are 5 topics you need to investigate and record. If you spend 20 minutes each day, for 5 days, you will get this project done this week!
