

Robots to the Rescue

What Is This Assignment About

This week you will be reading [a publication](#) that talks about how people are using robots in interesting ways.

Robots to the rescue?

What Are The Activities

This activity is basic: read the 8 articles & answer the 10 questions at the end (No building required 😞)

How Will You Get Credit

You will type your answers to all 10 questions in a Microsoft Word document and email it to Mr. Hurley by Sunday evening at 11:59pm.

How Much Time Should This Take

There are 8 short articles (1 to 2 paragraphs each) in this publication and each article has 1 to 2 questions to answer at the end of the publication.

If you do 2 articles & questions each day than you will be done in 4 days. You could spread it out more but this is pretty easy to finish this week.
