

7th grade Life Science

June 15th-19th, 2020

Teacher Information

Mr. McHenry shaunm@spokaneschools.org

Weekly Message

We are now in the last week of the 2019-2020 school year. This has been a year like no other and next year looks to be unique as well. All grades have to be submitted by end of day on June 19th so student work has to be completed BEFORE June 19th. Even though grading will be done, it is incredibly important that students continue to learn. Moby Max will be available through the summer to students who log in and do some work in July. By continuing to spend time learning students are setting themselves up to be better learners and know more content before they enter high school.

Virtual Meeting

Tuesdays from 11:30-12:00

These meetings are primarily geared towards answering questions.

Student Expectations

New learning and assignments: *Students should spend at least 20 minutes working through the assigned Science lessons on Moby Max each school day.* It is highly recommended to take notes while going through the lessons. Students can access Moby Max through their [Clever](#) portal on www.spokaneschools.org.

Communication: Students should check the announcements in Teams and their school email every school day. Students can email me if they have any questions and they can also bring questions to the virtual meeting.

Grading: Moby Max tracks the amount of time students spend working on the assigned lessons. Points will be given for spending at least 20 minutes each school day on the assigned lessons. Student scores on the lessons are also reported in Moby Max and will be recorded in the grade book. Moby Max is currently set to reassign a lesson automatically if a student scores below 70%.

You can log into Moby Max and work at any time to complete the work.

Scope and Sequence

Some students have not logged in to Moby Max so the assignments are loading a little differently. All of the assignments will be available and can be completed.

1. Animals, Part 1 & Lesson Test: Animals, Part 1
2. Animals, Part 2 & Lesson Test: Animals, Part 2
3. Life on Earth & Life on Earth Test
4. Introduction to Ecology and the Environment & Lesson Test: Introduction to Ecology and the Environment
5. Biomes and Ecosystems & Lesson Test: Biomes and Ecosystems
6. Heredity & Lesson Test: Heredity
7. Reproduction & Lesson Test: Reproduction

Please email me if you have any questions and remember to get outside and get some fresh air.
