

7th grade Life Science

May 4th – May 8th, 2020

Teacher Information

Mr. McHenry shaunm@spokaneschools.org

Weekly Message

Hello everybody! Thank you to everyone who joined the virtual meeting last week and have started to work through the assigned Moby Max lessons. I know that this is very different than learning in the classroom, but we can still learn all that we need to if we find a way to get the work done.

Virtual Meeting

Tuesdays from 11:30-12:00

These meetings are primarily geared towards answering questions.

Student Expectations

New learning and assignments: Students should spend at least 20 minutes working through the assigned Science lessons on Moby Max each school day. It is *highly recommended* to take notes while going through the lessons. The plan is to use Moby Max for the remainder of the year to assign lessons that match up with the content and standards that we have not covered yet. Students can access Moby Max through their [Clever](#) portal on www.spokaneschools.org.

Communication: Students should check the announcements in Teams and their school email every school day. Students can email me if they have any questions and they can also bring questions to the virtual meeting.

Grading: Moby Max tracks the amount of time students spend working on the assigned lessons. Points will be given for spending at least 20 minutes each school day on the assigned lessons. Student scores on the lessons are also reported in Moby Max and will be recorded in the grade book. Moby Max is currently set to reassign a lesson automatically if a student scores below 70%.

Scope and Sequence for the week

1. Complete Animals, Part 1 (from last week)
2. Complete Lesson Test: Animals, Part 1 (from last week)
3. Start on Animals, Part 2

Please email me if you have any questions and remember to get outside and get some fresh air.
