RE: RFP 33-1920 Spokane Public Schools Decision

Hello,

Thank you for your thoughtful response to our RFP process and the hard work you put into your demonstrations.

As a result of our district evaluation team discussion and guidance from our district leadership we have chosen to pursue a one-year K-6 solution for the 2020-21 school year. This will allow us to use next year to evaluate our long term planning and better evaluate our long-term budget capabilities.

In evaluating your solutions via our RFP guidelines we have chosen to pursue final awarding steps with Lexia and Dreambox for our one-year K-6 solution(s) to support teachers for the 2020-21 school year.

We will be opening a new RFP for an adaptive diagnostic assessment solution with a new district evaluation team to pursue an option for middle school grades (7-8) and adjacent grade levels (6,9,10) to consider intervention and transitions supports to be publicly posted tomorrow.

Thank you again for your time and effort to support our students,

Scott Kerwien
